Introduction

Moloch

The Moloch theme has minimal visual noise. It is a Typst port of the Moloch Beamer theme, which is a fork of the Metropolis theme by Matthias Vogelgesang.

Enable the theme with

```
#import "moloch.typ": *
#show: moloch-theme.with(
  config-info(title: [Title], author: [Author]),
)
```

Sections

Each level-1 heading (`= Section`) inserts a section slide. Its progress bar shows how far along the talk is, and the thin bar under every frame title does the same.

Elements

Typography

The theme provides sensible defaults to *emphasize* text, accent parts or show **bold** results.

- Regular, *italic*, **bold** and `monospace`
- Lists use a circle, a square and a triangle:
  - Second level
    - Third level

1. Enumerations are numbered
2. Like this

Blocks

A plain block

Blocks are transparent by default: a bold title and the body, nothing more.

An alert block

Use it for warnings or important results.

An example block

Use it for worked examples.

Columns

Left

- Pass a `composer` to split a slide
- Widths are free, e.g. `(2fr, 1fr)`

Right

Each argument in brackets becomes one column.

Math

Euler's identity, $e^{i\pi} + 1 = 0$, and the Gaussian integral

$$\int_{-\infty}^{\infty} e^{-x^2}\,\mathrm{d}x = \sqrt{\pi}$$

Tables and figures

Method	Error	Time (s)
Baseline	0.31	1.2
Proposed	0.18	1.9

Table 1: Rules are in the booktabs style.

Overlays

Touying's incremental reveals work as usual.

- Third point

Conclusion

Summary

- Moloch is minimal, with a title bar, a progress bar and little else
- Colors come from the Beamer theme, in light and dark variants
- Edit `example.typ` to start your own talk

Thank you!
